SEP 25 1958

MEMORANDUM FOR: Rear Admiral V. L. Lowrance,
Deputy Director of Naval Intelligence

SUBJECT : Reported Security Violation of
CHALICE Data by CNO

REFERENCE : Ser NT/000286-58, 15 September 1958
[Redacted]

25X1

1. Thank you for the explanation set forth in referenced memorandum.

2. There may indeed be occasion when theatre commands may require premission information bearing upon the CHALICE program. In cases where the Navy believes this to be absolutely essential, prior coordination with the Security Officer DPS/DCI of Project CHALICE (in accordance with established agreed procedure) should ensure proper handling of this highly sensitive information.

3. It is believed that the distinctions between CHALICE and TALENT are now entirely clear, and it is my understanding that instructions have been sent to theatre commands based upon a paper setting forth the distinctions ([Redacted] 26 May 1958). However, it is recognized that making these distinctions effective is a matter of education, and it is hoped that a forthcoming visit of Project CHALICE and TALENT personnel to the Pacific area (Hawaii) will through briefing and discussion eliminate any confusion now existing between the CHALICE and TALENT security systems.
